

Dedication to the Earth.

Organic Farming in Provence.

Welcome to Provence!. Provence is more dedicated than ever to "Biological Agriculture", organic Farming- And I believe that there is a new global awareness regarding what we eat and how our food is grown. Trying not to spray & use pesticides will keep us healthier in the long run. I wanted to make it clear that every tour that we design , we consciously look for a great chef who goes to the farmer's market, buy great quality meats, fish, vegetables and deal only with companies that have integrity and dedication to bringing the best from the market to your table. Wine tasting & Gastronomic meals will be part of our one week journey as well as touring the region.
